

A Regulation-Based Classification System for Marine Protected Areas (MPAs)

Horta e Costa et al. Marine Policy. DOI: <http://dx.doi.org/10.1016/j.marpol.2016.06.021>

Classification System of Zones within MPAs (a decision tree)

ZONE Classification

- 1** No-take/No-go
- 2** No-take/Regulated access
- 3** No-take/Unregulated access
- 4** Highly regulated extraction
- 5** Moderately regulated extraction
- 6** Weakly regulated extraction
- 7** Very weakly regulated extraction
- 8** Unregulated extraction

A Regulation-Based Classification System for Marine Protected Areas (MPAs)

Horta e Costa et al. Marine Policy. DOI: <http://dx.doi.org/10.1016/j.marpol.2016.06.021>

Classification System of MPAs

Next stage: how to classify MPAs

An MPA index is calculated based on the area each ZONE Class occupies within the MPA

$$\text{MPA index} = \text{SUM} \left(\text{ZONE}_i \text{ Class} \times \frac{\text{Area ZONE}_i}{\text{Area MPA}} \right)$$

Example of a multiple-use MPA with 3 zones (and corresponding zone classes) occupying different areas

EXAMPLE

MPA with 100 ha of total area

15ha class 1 + 35ha class 5 + 50ha class 8

$$\text{MPA index} = \left(1 \times \frac{15}{100}\right) + \left(5 \times \frac{35}{100}\right) + \left(8 \times \frac{50}{100}\right) = 5.9$$

MPA index

MPA Classification

1 to 3 *incl.*

FULLY PROTECTED AREA

3 to 5 *incl.*

HIGHLY PROTECTED AREA

5 to 6 *incl.*

MODERATELY PROTECTED AREA

6 to 7 *incl.*

POORLY PROTECTED AREA

7 to 8

UNPROTECTED AREA

A Regulation-Based Classification System for Marine Protected Areas (MPAs)

Horta e Costa et al. Marine Policy. DOI: <http://dx.doi.org/10.1016/j.marpol.2016.06.021>

Indices of Activities (supporting information for the decision tree)

* Highest fishing gear score

| Fishing gear (commercial or recreational) | Gear score |
|---|------------|
| Beach seines | 8 |
| Cast nets | 3 |
| Dredges (bivalves) | 7 |
| Drift nets | 5 |
| Fish traps | 6 |
| Fixed fish traps "madrague" | 6 |
| Gillnets | 6 |
| Hand dredges (bivalves) | 5 |
| Hand harvesting | 4 |
| Intertidal hand captures | 3 |
| Lines (jigs, hook and line, rod, troll) | 5 |
| Longlines (bottom) | 5 |
| Longlines (pelagic) | 4 |
| Purse seining (bottom) | 9 |
| Purse seining (pelagic) | 5 |
| Spearfishing/diving | 3 |
| Surrounding nets near shore | 8 |
| Tammel nets | 8 |
| Traps (lobster/octopus/crab) | 4 |
| Trawl (bottom) | 9 |
| Trawl (pelagic) | 5 |

≤ 5 corresponds to highly selective and low impact gears (e.g. lines, octopus traps);
6-8 medium impacting gears (e.g. fish traps, bottom longlines, pelagic towed gears);
9 to the most destructive gears affecting biodiversity and ecosystems (e.g. bottom trawling, bottom purse seining)

** Aquaculture or bottom exploitation index

| Activities allowed | Index |
|---|-------|
| Aquaculture and bottom exploitation not allowed | 0 |
| Aquaculture OR bottom exploitation allowed, but not mining/oil platforms/sand extraction/detonations | 1 |
| Both aquaculture AND bottom exploitation allowed with no restrictions (or if aquaculture is not allowed but mining/oil platforms/sand extraction/detonations are) | 2 |

*** Anchoring/boating index

| Activities allowed | Index |
|--|-------|
| No anchoring | 0 |
| Boating and/or anchoring allowed but anchoring is fully regulated: restricted to particular areas or mooring buoys | 1 |
| Boating and/or anchoring allowed but anchoring is only partially regulated or unregulated | 2 |
